Open For Business

at our new store

We invite you to come in and see us in our new store (on our old location) which we opened for business last week.

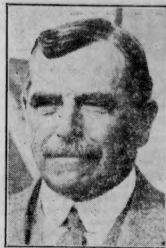

A large shipment of dry goods has just been unpacked and placed on the shelves, marked at most attractive prices.

Among this new stock is everything that may be required in harvest field wearing apparel.

Everything in Quality Groceries

J. J. PURCELL

GENERAL MERCHANT

PRESIDENT OF CANADIAN BAR
Chief Justice Martin, of Montreal, who has been elected President of the Canadian Bar Association to succeed Sir James Aikins.

MISS MEGAN LLOYD GEORGE
Daughter of the famous British Liberal leader, who has been asked to contest the seat at Pontypridd, Wales, as a Liberal, during the next election.

Corn Show to Be Held in Calgary

The Alberta Provincial Corn Show is to be held this year in Calgary on November 17th and 18th. At a recent meeting of the directors of the Corn Growers' Association a prize list totalling over \$800.00 was drawn up which makes provision for all the leading varieties and classes of field corn, sweet corn and popcorn.

The more important ten ear classes are yellow flint, white flint, yellow dent, white dent, northwestern dent, and falconer, for each of which fifteen prizes are offered, with a first prize of twenty dollars.

At last year's show the classes which attracted the most attention were those for 800 ears, one for flint varieties and one for dent varieties. These classes were being continued with a first prize of fifty dollars in each class, and others of twenty, ten and five. There are also classes for sheaves, and those intending to compete in the sheaf classes should save corn at an early date and cure them with the ears and leaves intact.

For boys and girls under seventeen years there are two classes with fifteen prizes in each class, one for ten ears of white flint and one for ten ears of yellow flint. A silver challenge trophy is to be awarded to the owner of the best exhibit in the junior classes.

The prize list with rules and regulations will be issued shortly and may be had by writing to the secretary-treasurer of the Corn Growers' Association—James Murray, Medicine Hat.

Select and Cure Seed Corn Now

To insure a dependable supply of seed corn it should be selected early—before severe frost—and carefully cured. The best seed corn to be had is that which ripens in the district where it is to be grown, as it is more certain of producing a satisfactory crop than shipped in from several hundred miles south.

Corn of all kinds is latter than usual this year on account of late planting, and the cool weather that we had during May and June, but a considerable proportion will make good seed if it is gathered before the frost and cured thoroughly. If the flint varieties have started to glaze they may be safely gathered, and if the dents show sign of denting they will cure into a good grade of seed.

As soon as the ears have been pulled the husks should be stripped back or removed to allow the moisture to escape.

(Continued on page 8.)

School Opens

School opened last Thursday for the fall term, and pupils are now nicely settled down to work. Those who are not yet enrolled are urged to delay no longer, so that they will not miss any of the work.

A new fire escape, a much needed safeguard, has been constructed at the south side of the school building, and is now being painted.

School Fair Thursday September 22

At a special meeting of the officers and directors of the Oyen School Fair Association held at the home of J. J. Kelly on Monday evening, September 5, it was decided as a special feature of the School Fair to give a prize for the best parade of pupils from individual schools. Points to be considered to be banners, costumes, badges, colors, uniformity, yell etc. Dr. McPhail very generously offered a cup for competition among the schools on parade, the cup to be held for one year by the school winning the prize.

It was further decided to hold the School Fair at the Agricultural grounds and committees were appointed.

To receive and place exhibits: Vegetables, Mrs. Gillespie, Mrs. Langmuir; Flowers, Mrs. S. A. Miller; Grain, Mr. D. May; Noxious Weeds, Mr. D. May; Live Stock, Dr. J. P. Kerr; Cooking, Mrs. Whitlock; Sewing, Mrs. Kelly; Industrial Art, Grade III and IV, Miss Walker; Grade V to grade VIII, Miss Colwell; High School, Mr. W. L. Irvine.

Penmanship, and Composition, Rev. Father Lynett; Elementary Science and Geography, Rev. H. Wood.

The schools participating will be visited by the following members of the School Fair committee: Rev. H. Wood, Rev. Father Lynett, Dr. McPhail and Mr. F. L. Aylesworth.

Sports Committee: Dr. McPhail, Mr. W. L. Irvine, Rev. Father Lynett, Mr. Geo. Morrison, Mr. C. L. Dunford, Rev. H. Wood, Mr. W. B. Dobbin, and Mr. Fred Stankiewicz.

It was further decided to provide hot Cocoa for the children from rural schools.

Mrs. Long, Mrs. McLaren and Mrs. Acheson appointed in charge.

All parties interested will hear in mind the fair will be held on Thursday, September 22.

September Announcement

A shipment of Ladies Winter Coats to arrive about Saturday, September 10th. Newest styles moderate prices.

The Classic Millinery of Calgary, will have their representative, Mrs. Stinson at our store, Tuesday, September 13th, with the newest in Hats. Call and see them.

Ladies, you want fine Furs. See our offerings in fine Stoles, Lamb Coats, Seal Coats, Beaver Coats etc. to be shown here about the 15 inst. If interested enquire for exact date. If you are interested in a New Fur it will pay you to see these, made by Coristine of Montreal. The very best in Canada.

Our guarantee is behind their goods. Their guaranteed backs them. What more do you want!

Threshers they will pay you to see us for supplies. We buy our groceries in Car lots and are in position to quote keen prices.

Newsprint Industry Expanding In Manitoba When a Second Big Paper Mill Is Mooted

The newspaper industry has long been established and rapidly expanding in all eastern provinces. It is growing up and new similar growth is being seen in the prairie provinces. Now the forests of the prairie provinces are being called upon to furnish raw material for newspaper demands.

One of the most outstanding recent items of interest in the Canadian newspaper is the application before the Federal Government for a pulp wood berth on the Nelson River in Manitoba, capable of supplying a newspaper mill of 400 tons per day.

This the contiguous to the Hudson Bay Railway, being between the Nelson River and Lake Winnipeg, and is the second berth sought in the Province of Manitoba. The Manitoba Paper Company already has obtained a berth with 6,000,000 cords of wood on the east side of Lake Winnipeg, and has built a mill at Pesa Falls, with a capacity of 200 tons per day, described as the largest enterprise in the province.

A 400-ton-per-day mill, according to experts, will require a berth containing at least 3,000,000 cords of pulpwood. Pulp for the mill will be obtained from White Mud Falls on the Nelson River, one of the great power sites in the Dominion. An option on these falls, the Dominion has secured by the Manitoba Paper Company behind the new pulpwood application. The falls are understood to be capable of furnishing a great deal more power than the mill will need, and this is expected to be utilized by the growing industries of pulp and saw, and thus further Manitoba's mining development at the same time.

The founding of a second newspaper mill in Manitoba would mean a great deal to the province not only in its income but also in its timber supply. A 400-ton mill would necessitate an outlay of about \$3,000,000, and the development of White Mud Falls would require considerable additional capital. The mill would find employment for two thousand men, and apparently surplus in volume of output, as of Manitoba's present industrial enterprises.

The projection draws further possible attention to the timber resources of the Prairie Provinces, which in this respect, hold their name. The lumber industry has long thrived in all three provinces and its production goes no inconsiderable way to meet domestic requirements. The newspaper industry is rapidly going to them. Manitoba is shipping up 70 per cent. wood, and the province has been estimated to contain 1,250,000 cords of saw timber, or 1,600,000 B.M. In the sister province of Saskatchewan, the timber is estimated (timbered with merchantable trees is about 750,000 acres. The Province of Alberta is estimated to contain about 21,000,000 feet of white pine, and other the Prairie Provinces contain about 8,000,000 acres of commercial timber lands, and there is in them large reserves of pulp wood on which no really accurate estimate has been made.

Opening Of The Canadian Rockies To Motorists

Among the long-closed regions of wonder and romance into which a way has at last been found for the Canadian Rockies. Each year the door opens a little farther, until now good part of the most beautiful sections of these glorious ranges is within the motorist's reach. The opening this year of The Kicking Horse Trail, stretching up Yoho National Park, to motor with the outside world, marks the fulfillment of one more daring engineering conception.

Cafe Has New Idea

There is a roadside cafe near Pomona, Calif., that offers a new wrinkle in entertainment. The patron who wants a fish dinner and is willing to wait for it is supplied with a pole, line and fly and allowed to catch his own in a small brook that is kept heavily stocked with hungry trout. While the fish are being prepared, he may enjoy a walk in the park, or a game that is operated in connection with the cafe.

Gives Autos For Charity

Harold Bying of Vinny, former Governor-General of Canada, has donated to charity three high-priced automobiles which he used while at Rideau Hall. Mayor LaBarriere, who has received official advice that cars have been placed at his disposal to be given for charitable purposes, has already been likely to be sold and the proceeds given to charity.

W. N. E. 1927

Garnet Ranks Among Good Milling Wheat

Opinion Given In New Bulletin Issued By Experts

Garnet wheat, entitled to rank among the good milling wheats. This is the considered opinion of I. H. H. of Toronto, the Dominion Cerealist, as expressed in his new bulletin on "Garnet Wheat." The chief point in which garnet may be open to a little criticism is in the color of the grain, which is slightly more yellow or creamy than is that of Marquis. The unbleached flour of Garnet when freshly milled may be described as a light yellow or creamy yellow, while that of Marquis may be described as creamy white. Since, however, bleaching and maturing processes have become highly developed and are becoming generally practiced, the objection to the color of Garnet, if it is an objection would appear to be appreciably minimized.

Garnet means to be about the equal of Marquis in weight per measure bushel, and where the supply of Marquis is ample it may even exceed it. It is a wheat which yields about equal in bush yield, but the ash content of Garnet is generally appreciably higher than that of Marquis. Garnet is generally produced in a higher bread yield and a loaf of slightly greater volume than Marquis. In the absence of crumb Garnet is almost equal to Marquis, and superior to Red Fife, Eureka Triumph and Kitchener. Good texture combined with high loaf volume is highly regarded as an indication of high baking strength.

Says Canada Finest Place For Emigrants

Ideal For Surplus British Millions

Opinion Of Dr. Brown
In an interview at Regina, Dr. Brown, retiring president of the World's Poultry Congress, London, England, said that he had become a missionary for Canada.

"You have a fine country," he said. "It is so diversified and so richly attractive throughout its length and breadth."

He thought it the choicest of lands for immigration. When he arrived home, he said, he would not have the slightest hesitation in recommending immigration to Canada. He pointed out that Canada had increased enormously in population despite the tragedy of war.

"Saskatchewan is the ideal place for surplus populations," he concluded.

World's First Turkey Show

Dallas was selected as the most local city in which to hold the "All the World Turkey Show" January 11 to 16, by the Southwestern Turkey Club, which met at the Adelphi Hotel, Dallas, Tex., recently. Invitations will be sent to all turkey clubs in the United States and Canada to participate in the first national gathering of turkey raisers ever planned.

Before guests become so generally used, persons fortunate enough to possess any guarded their closely, often at the expense of their business records to their keds; this they became known as "leggers."

Great Britain Would Take Canadian Cattle

But Cannot Pay Present Price Says London Man

Great Britain would Canadian cattle on the hoof as all other cattle markets the world over, except that of Ireland, are closed to her owing to hoof and mouth disease, but she cannot pay Canadian the price as it now stands, declared Henry Ridpath, vice president of the Canadian Chamber of Commerce, London, and special representative in Great Britain of the National Live Stock Association, at the Alexandra Hotel, Winnipeg, where he was in conference with Mr. Burns.

Great Britain's requirements in the meat line are approximately 2,000,000 tons per year, half of which she imports from the United States, Australia and New Zealand in the form of chilled or frozen meat. Mr. Ridpath said:

"The high price in the United States, which are kept up by demand from the United States, the export of live cattle to Great Britain has fallen off from 100,000 head, in 1925, to 5,000 as far this year. Not even carcasses may be brought in from the Continent," Mr. Ridpath said, in strict accordance with the regulations.

No Market For Poor Hay

Notice States U.S. Has Prospect For Record Crop

The Canadian farmers are warned against shipping poor hay to the markets of the United States in a notice issued by the Department of Agriculture. The announcement says:

"The attention of Canadian farmers in the hay shipping sections of Canada is drawn to the warning given by the United States Department of Agriculture that shippers make certain of their market before hauling and shipping any poor quality hay. The warning is that the United States is not in the market for hay of poor quality."

"There is a record hay crop in prospect in the U.S. Present to 600,000,000 are that it will amount to 102,699,000 tons, or 16,000,000 tons more than last year, and 1,500,000 tons more than in the previous record year of 1921."

"Even last year, when the United States hay supply was the smallest since the arrival at markets there were fully equal to the demand. This year there will probably be sufficient good hay to meet all requirements and poor hay will find a dragger market."

Ability Is Uncanny

Bill Jenkins, a sixty-two-year-old clockmaker who for the last thirty-two years has been winding and tuning the 1,500 clocks of the Navy Hotel, London, claimed many years ago that at any hour of the day or night he could tell the time within half a minute. This claim, which he had the British Medical Society, members of which have tried by numerous tests to disprove what they call his "acute psychomotoric sense."

The Dominion of Canada was formed in 1867. Today there are sixty-seven languages spoken in the Dominion.

Flattery consists of having your secret opinion of yourself expressed in the language of others.

Agricultural Possibilities Of Hudson Bay Railway Belt Are Now Being Determined

Live Stock Totals

More Horses in Canada in 1926 Than in Previous Years

It is interesting to note from the very comprehensive report of the Director of the Experimental Farm System of Canada for the year ending March 31, 1927, that the rapid progress of motive power has not made any material difference during the last five years in the number of horses in the country. As a matter of fact there appears to have been more horses in Canada in 1926 than there were last year or in 1925, but in 1922 and 1921 the totals ran somewhat higher. Milk cows show an increase in 1926 over any other year, but other cattle show a decrease, the difference between 1925 and last year being no less than 766,150. Sheep show an increase in 1927 over the three preceding years, although fewer than in 1922. Swine are greater in number than in any other year excepting only 1924.

It cannot be said, states the report, that the agricultural future of the country has been accurately determined as yet, despite the fact that success has been met in a small way. At the same time prospects are by no means discouraging. The fact that arable soils is known to be considerable; rainfall is sufficient and soil (moist) and summer temperatures as recorded at The Pas and Norway House are exceedingly favorable to fast growth and early maturity of crops. As far as the Hudson Bay Lake the natural depth of the well drained areas is practically identical with that of similar ground in the Hudson Bay drainage area, west from Split Lake. Some conditions of the relative surface conditions of the country may be obtained by examining a cross section of the country from The Pas northeast towards Nelson for approximately 250 miles, and an examination of lands adjoining the railway.

Alberta's Coal Wealth

Greater Than All Known Coal Deposits in Rest Of British Empire

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, Sir Thomas Hall, chairman of the Empire mining and metallurgical council, stated at Montreal previous to sailing for home.

"If the present endeavors to change coal into field fuel capable of displacing petroleum and all its products are successful, the advantage of the United States in having the richest coal fields in the world will be nullified, and Canada will take the place of the United States as the world's provider of liquid fuel," Sir Thomas said.

Fry Distribution In Manitoba

The Department of Marine and Fisheries announces a distribution of over 75,000,000 white-bellied fry from their hatchery at Winnipeg, Manitoba. This is an increase of more than 21 per cent over last year's crop. The fry were all planted out in good condition on suitable grounds in the lake over a wide area in May of previous year, some of the fry being taken as far north as Whiskey Lake in the northern portion of Lake Winnipeg.

Ontario Gas and Auto License Taxes

Definite announcement was made here recently by Hon. G. Howard Ferguson, premier of Ontario, to the effect that legislation providing for an increased gasoline tax and reduced motor license tax would be brought down by the government at the next session of the Ontario legislature.

Layser: "I think I can get the jury to exonerate him."

"You don't care to be too exonerated. Ah wants to be let loose!"

Copper Deposits In Canada

Changes due to the fact that, including the native metal are found in many places throughout Canada. Production has so far been confined to the following areas: (1) the importance: British Columbia, Ontario, Quebec, Manitoba, and Yukon. Deposits of copper ores are also known in the Maritime Provinces, and in the Arctic regions of Canada. The Arctic deposits, although at present insignificant, are of great importance of the great copper reserves of the future.

Mount Duff Is Located On The Inter-Provincial Boundary Between British Columbia And Alberta

According to the Eighteenth Report of the Geographic Board it is named after Mt. H. Hon. Mr. Justice Lyman Duff who was one of the judges before the Alexander Boundary Tribunal.

WORLD HAPPENINGS BRIEFLY TOLD

The first test cab appeared in the streets of Jerusalem recently. It excited a vast amount of curiosity.

An invitation to visit China to promote aviation has been extended to Col. Charles A. Lindbergh, New York. Paris, France. Lindbergh said he might accept.

More and better immigration for Canada is the prospect for 1928. W. J. Egan, deputy minister of immigration, declared on his return from a European tour that lasted more than three months.

Viscount Cecil, of Chelwood, had definitely resigned his cabinet post as chancellor of the Duchy of Lancaster, and will not go to Geneva for the meeting of the League of Nations Assembly.

Arthur Joseph Noel, the fourth Earl of Gainsborough, private chamberlain of Edward and king to Pope Benedict XV, and Pope Pius XI, and former attaché at the British embassy at Washington, died Aug. 27. He was 82 years old.

The Soldiers Settlement Board, which has handled the placing of returned men on the land, will be incorporated in the Land Settlement Board in the Department of Munitions, reports Hon. Robert Burke, minister of immigration and colonization.

For having set fire to a stack of hay containing about 22 heads of heading to his employer, a young man named Mountain, a recent arrival from the Old Country, was sentenced at Winchester, Ont., to serve one year in the Guelph reformatory.

The University of Toronto, conferred its highest honor, the degree of Doctor of Laws, honoris causa, upon Rt. Hon. Lord Howard of Effingham, Lord Chief Justice of England, at a special convocation in Convocation Hall, Toronto.

Between 220 and 300 people have been killed and more than 2,500 injured in less than 18 months past as a result of religious conflicts between Hindus and Muslims in various parts of India, Lord Irwin, the viceroy, stated in addressing the legislative assembly at Simla.

John B. Stimpson, a British scientist, has left Edinburgh, Scotland, with the intention of making his home in an iceberg for three months. He was accompanied by a Stimpson dog. "My purpose," said Stimpson, "is to gather material for a book on the ice fields."

A Valuable Hen

An offer of \$15,000 for a famous hen, No. 6 or 13,000 for a pair of ten birds including this world record layer was turned down by the University of British Columbia on account of the great value of the bird for breeding purposes.

Buildings built with wood are better for reproducing sound than those with walls of other material.

A bluish is one of the few things that cannot be counterfeited.

Diarrhoea Summer Complaint HE ALWAYS USES

Dr. Fowler's Wild Strawberry Extract is the only medicine for diarrhoea and summer complaint. It is the only medicine that is safe for children and the only one that is pleasant to take. It is the only one that is effective in all cases.

Mr. T. F. McGee, McLean, Alta., writes: "Over forty years ago my mother used to give me Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. It has been the same since then when I have had an excessive looseness of the bowels I have been accustomed to take a few doses of it and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute. The valuable preparation has been on the market for the past 80 years; put up only by The T. F. McGee Co., Limited, Toronto, Ont.

W. N. O. 1897

Motor Penetrates Far North

English Woman Breaks Distance Record By Three Miles

Two British motorists who have just achieved the feat of breaking the "farthest north" record in a motor car, were turned back when 270 miles within the Arctic circle by icy conditions, arising from the intense heat.

The Hon. Mrs. Victor Bruce and party, who have returned to London after a 6,000 miles' trip through Northern Norway to Finland and Lapland, went about three miles north of the North Pole than any previous motorist has penetrated, and got within 10 miles of the North Pole.

The average 270 miles a day for 25 days, some of the journey being over rough tracks in Northern Scandinavia. The enterprise was undertaken partly with the object of inspecting the roads of Sweden on behalf of the Automobile Association, and partly purely for the sake of adventure.

Her husband was accompanied by Mrs. Bruce, and a son of 12. The latter, "One of my great ambitions," said Mrs. Bruce, "was to be able to say that I enjoyed a bath in the Arctic Ocean but the swamps in Northern Lapland prevented us from getting to the coast at all. We went fully prepared for very cold weather, but actually the average temperature in the Arctic areas which we traversed is about 50 degrees in the shade at this time of year."

It is not so strange when you think of it for the sun never sets in summer in these latitudes. It was rather remarkable to observe the extent to which the motor is penetrating into the Far North of Europe, and I anticipate that within a very few years roads will be available for car tourists right up to the North Cape.

Irish Free State Issuing New Coins

Design Of Young Yorkshirman Won In World Competition

Designs submitted by leading sculptors from all parts of the world, that of Mr. Percy Metcalfe, a young Yorkshirman, has been accepted by the Irish Free State Government for its new coinage.

A hen, a sow, a hare—to illustrate the food-producing power of the Irish Free State—all had to be worked into the winning design.

Mr. Metcalfe, who is being given a portrait by King Paul in connection with a portrait in metal which has been commissioned to execute, declared that his Irish success was due to a portrait in metal which he has been commissioned to execute, declared that his Irish success was due to a portrait in metal which he has been commissioned to execute.

Very Likely Old

Julia Parker was seen on Broadway the other day, when it was found, wearing a fur piece around her neck.

"My goodness!" said a friend, "How can you wear a fur in the summer?"

"Well," replied the dancer, "the animal who he it originally used it in the summer, didn't he?"

First Shipment Of Antelope

The first shipment of antelope from Canada to the U.S. will be made in an early date, Charles Barker, rancher, at Lake Newell has contracted to deliver 25 head of antelope to a Texan banker.

Witness Centenary Celebrations

Mr. Ashby and C. E. King, from Uxbridge, England, returning home on the Canadian liner Anzonia from Montreal, after a visit to Uxbridge, Mass., where they witnessed the centenary celebrations, and Uxbridge, Ont.

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, freedom from rust, and many other good qualities, make it a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

Japanese Plan To Fly Across Pacific

Long Distance Flights Have Aroused Their Interest

The latest successes in non-stop flights have stimulated Japanese interest in aviation and efforts are being made to launch tangible preparations for a Japanese attempt to fly the Pacific Ocean next year. It is considered that the chances of such a feat being accomplished by Japanese airmen or machines being ready for it within 12 months are small.

The decisive factor is that Japan possesses an aeroplane capable of making the journey and has no pilot, civil, military or naval, with the necessary skill and technical ability. A foreign plane might be bought but public opinion realizes that half the honor would be lost by such a project.

The status of aviation in Japan is correctly reflected by the fact that Japan's record for continuous flying is only 13 hours, while two hours is the record for night flying.

The best Japanese achievement hitherto, and the only one of international note, is the 1225 flight to London via Siberia made by two civilian fliers.

Among the reasons advanced to explain Japan's backwardness are: First, that Japanese airmen have plenty of courage but lack the initiative and that enthusiasm for the art of flying which characterizes Lindbergh, Chamberlain and Ewing.

Secondly, the Japanese are "unmechanical" and lack "engine sense." For example, they often fail to notice when their motor starts missing. Thirdly, official regulations hamper practice, for the air above Japan is said to be unusually tricky, thin and full of holes of variable quality.

These facts reveal how much remains to be done before a Japanese sailor can wing his way to Seattle.

Mining Men Go To Europe

Will Investigate Treatment Of Coal For By-Products In Germany

Hon. Charles Stewart, minister of mines, and Dr. Charles Campbell, deputy minister have sailed for Europe. Mr. Stewart is one of the Canadian Government representatives to the League of Nations conference at Geneva.

After the sessions of the League and Dr. Campbell will visit many of the industrial centers of Germany and England for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by-products in Germany.

Producers in Germany claim that they can secure oil from coal at a less cost than their crude oil.

Getting Rid Of Circumstances

It is related that John Lawrence, who ruled the Punjab seventy years or so ago and who later became Viceroy of India, used to say that when he came across a young Britisher in the India civil service who was encumbered with a wife and a piano, he insisted him about from one jungle station to another till the young man parted first with the wife and then with the piano.

Adversity sometimes transforms a coward into a hero.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

SOLOMON DEDICATES THE TEMPLE

Golden Text: "I was glad when they said unto me, let us go unto the house of Jehovah."—Psalm 122.

Lesson: 1 Kings 8.

Devotional Reading: Psalm 122.

Explanations and Comments

1. The Great Procession With the Ark and the Tabernacle, verses 1-5.—It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Lev. 23:34), that the elders of Israel and all the heads of the tribes followed up the ark of the covenant out of the city of David, which is Zion. Both the House of Commons and the House of Lords were present, as we would put it, for the elders were the chosen representatives of the people, and in persons of the fathers' houses were the hereditary nobles. In addition there was great attendance of the rank and file (1 Kings 8:1).

2. Two processions advanced from different directions. One came from Gibeon and bore the sacred tabernacle with its goat-hair covering and boards of acacia wood, and its holy vessels—the golden altar, the golden candlesticks, the table of show-bread, and the brazen serpent. On Mount Zion the procession joined the other which bore the ark away from Gibeon. It reached the temple in Jerusalem by David. As the two processions proceeded to the temple, Solomon said: "A great congregation with him sacrificed a host of sheep and oxen." The road was filled with the streams of blood. The air was darkened with the clouds of incense; the songs and dances were unintermittent. Onward the ark was moved up the slope of the hill. It entered court after court. It reached the temple. "By this lavish laughter Solomon was honoring God," says the Bible. In those days it was a primitive method of saying that people set to him to honor the honor they would show Jehovah.

3. There is something revealing in the fact that the tabernacle, but there is a noble side to such garishness of slaughter. It was, but it is not so. Before we blame them, we must be ready to give as freely as they purified, higher way to the service and worship of God.—R. C. T.

Motor Exhaust Kills Tulips

Famous Dutch Flower Die In Gardens Of Paris

The famous Tuliperies have been blighted for the last time by the victims of the exhaust of automobiles in this Rue de Rivoli. The bulbs were presented to the city of Paris by Louis Napoleon five years ago and were planted in the Tuliperies gardens, an ideal setting for their masses of gorgeous colors. But each year they have dwindled and it was found that the prevailing westerly winds blew on to them a low wave of noxious gas from passing automobiles. The city authorities, after an additional proof of the deleterious effect of the growing number of automobiles on the Tuliperies of Paris.

Advertising Canadian Bacon

Fine Quality Is Stressed By Empire Marketing Board

That the Empire Marketing Board is up to its work in the way of the display advertisements in the leading papers of the United Kingdom, Home and Canadian have been the products recommended to the consumer on the ground that it has no disease, of cure and the quality. For all who wish to get an appetizing meal for breakfast the empire board meet every requirement—either home grown or from Canada. The fact is emphasized that Canada sends the very best that is turned out from the packing plants.

Were Great Statesmen

Fathers Of Confederation Praised By Sir Arthur Currie

"No council of statesmen in the world's history has surpassed the Fathers of Confederation for keen and practical nationality for sagacity for judgment, for self-effacement, and idealistic vision. The road they travelled was a difficult one, beset by numerous pitfalls. They fought their differences, the provincial rivalries, their creeds and nationalities in their hope for a greater Canada."

This was the tribute paid by Sir Arthur Currie, commander in chief of Canadian forces during the Great War, in the course of an address before the Military Institute at Vancouver.

Energy From The Sun

The sun is near, says Charles F. Kettering, New York inventor, when the energy of the sun will be put directly to work instead of storing it up in coal and oil deposits and using it as a power source. Uncounted billions of potential horsepower are going to waste each day, he says, because the sun's rays are not used.

The Oyen News

About Town and Country

By the time the bulk of the wheat is moving in Alberta this fall, the Alberta Wheat Pool will have 135 elevators completed and in operation.

Work on Purcell's new warehouse was commenced last Monday.

Mr. and Mrs. G. A. Morrison left last Sunday for Calgary where they will spend a few days.

Mr. E. H. Paley of Alaska is in charge at the drug store, during the absence of Mr. Morrison.

Doris, the six-year old daughter of Mr. and Mrs. Nathan Shaw, was operated on at Oyen Hospital yesterday, in an effort to save her leg. At time of going to press, she is reported to be doing as well as can be expected.

Miss Glenell Colwell returned to Oyen last Thursday to resume her duties on the staff at Oyen School.

Reconstruction on Miller's store front was commenced yesterday, when more than half of the old front was torn out and a temporary partition constructed. Work was suspended this morning owing to wet weather.

Dr. and Mrs. W. D. McPhail returned from Winnipeg last Sunday. While away from Oyen, Dr. McPhail was engaged in post graduate surgical work in Winnipeg and Rochester.

The Alberta Wheat Pool is not operating a coarse grain pool this year. Blank coarse grain contracts have been sent out and if a sufficient acreage is signed a coarse grain pool will be operated next year.

An electrical storm of almost tropical violence occurred last night between 7 o'clock and 8:30 during which time two short heavy showers fell. Light intermittent showers fell during the night. The weather this morning is cloudy with light showers.

IF
WINTER
COMES
by the same author

JOHN D. CRAIG

Director-General of Surveys for the Canadian Government, who has come to Vancouver to study the problems of the international boundaries between Canada, the United States, and Alaska.

The E. P. Ranch, owned by H.E.H. the Prince of Wales, has been signed to a Wheat Pool contract. The ranch contains a section of land and is located near High River, Alberta. The Prince was a recent visitor at his ranch and while there instructed W. L. Gaulty, his farm manager, to have the acreage placed under Pool contract.

Patrons of Oyen Theatre will be pleased at the announcement that Colleen Moore will be the attraction next Friday and Saturday in the delightful comedy "It Must Be Love", adapted from the Saturday Evening Post story "Delicatessen". On Monday and Tuesday, "Summer Bachelors" with Madge Bellamy in the leading role, will be presented. This has for its setting New York, and deals with the adventures of a young lady who decided she will never marry.

Miss Margaret Richie, who has been the guest of Mrs. Whitlock left last Sunday for Corral where she will be on the teaching staff.

"I see Ike Rosenbaum had a terrible fire last night."
 "Well, he's a nice fellow; he deserves it."

Select and Cure Seed Corn Now

(Continued from page 1)
 quickly. They may be tied up in bunches so that the air can circulate freely around them or they may be placed in a wire rack made by nailing chicken wire on each side of a two by four framework. It is important that the ears do not touch one another, that there be a free circulation of air in the room, and that the temperature of the room be above freezing point until the ears are well dried out. To be sure of this it is usually advisable to make provision for heating the room used for curing the corn. When the corn is completely dry severe frost will not damage it, but when it is full of moisture it may be completely ruined by frost even when under cover.

In a season when good seed corn can be secured it is advisable to save enough for two seasons planting as there are years when little corn ripens.

Keep the Corn Shows in mind and show some of the best you have grown to see how it compares with that others have produced. Or better still attend one of the corn shows and see the different lots for yourself. There is no better way to get to know seed corn.

James Murray,
 District Agriculturist
 Medicine Hat.

Here and There

The apple crop this year will run to 2,500,000 barrels, according to W. H. Chase of Wolfville, or a fifty per cent. increase over last year, while the crop of the Eastern States is reported only half that of last year.

The Department of Lands and Forests of the Province of Quebec have planted 1,000,000 trees this year, a record figure and nearly double that of last year. Next summer it is proposed to plant 2,000,000 trees.

Canada's net debt decreased by \$52,408,420 during the first four months of the fiscal year. It now stands at \$2,205,335,940. During this corresponding period of last fiscal year there was a decrease of \$1,251,585. Both revenue and expenditures show increases.
